FEND-ALL® Dock Fenders

STRENGTH AT THE CORE. DURABILITY BY DESIGN.

FEND-ALL® Dock Fenders are the highest quality dock fender on the market today!

Marina Products & Equipment is proud to be the sole manufacturer and distributor of the best dock fenders on the market. FEND-ALL® Fenders are the ONLY continuously supported, double wall fenders available with an internal high-energy absorption web. This unique design, combined with a special UV stabilized material, makes the FEND-ALL® line of fenders the standard bearer for all marine fenders. They are made of special PVC and are designed to face the harshest climates. FEND-ALL® fenders are trademarked and patented. They have a life expectancy of 10+ years and come with a 3-year warranty. What more could you ask for?

Fend-All® Bumpers
Standard lengths of 6', 8', 10', and 12' available in black or white. These fenders are designed primarily for vertical application to a piling or bulkhead. They can be mounted horizontally as well. Also available mounted on 2 x 4 or 4 x 4 recycled plastic lumber. Used for vessels from tenders to large yachts.

Crowns
Caps for Fenders available in black and white.

To locate a FEND-ALL® Dealer in your area, or to become a FEND-ALL® Dealer, visit FendAllFenders.com.

Marina-Products.com | 954-462-9047
This fender is intended for use with small boats up to 30’, or in areas where a lower profile fender is necessary due to space restrictions for slightly larger vessels. This is possible due to the internal high-energy absorption web. It is available in a standard length of 10’ only, black or white.

This fender has larger dimensions and a greater wall thickness for use with larger vessels. It can be mounted vertically on piling or used horizontally on the side of the dock. Intended for use on medium sized boats up to 60’.

A revolutionary design in corner fenders, this fender can be installed both vertically and horizontally. It is used primarily to protect vessels from sharp protruding corners or bulkheads. Its internal high-energy absorption web can handle a variety of different size vessels. Available in 10’ and 12’ lengths, black or white in color.

Your answer for maximum protection in narrow slips with no need for special fasteners, this fender is designed to be mounted directly to pilings using stainless steel nails. It is available in 6’, 8’, 10’ and 12’ lengths, black or white in color. Suitable for boats up to 80’.
This fender is generally used in horizontal applications and is a perfect heavy duty fender for use on floating docks. It is available in a standard length of 10’, in black or white. With its larger dimensions, greater wall thickness, and internal high-energy absorption web, the FA 201 can handle vessels much larger than the typical floating dock fender available on the market today.

Dock builders, marinas and smaller boat owners asked for profiles with lighter duty wall sections to provide protection for their applications. In response, we offer this edging product, made from the same quality marine grade resins and with the same double molding process as other FEND-ALL products. It is available in 10’ lengths in black or white. Height 3-1/8” x Width 2”.

SS Roofing Nails

We recommend installation of all our fenders with 1-1/2”, 316 grade stainless steel, ring shank nails. Available by the pound or by the case.
FEND-OFF® Dock Fenders

These dock fenders not only provide maximum protection for a vessel’s hull, but will stand up to the harsh marine environment. The outer shell is made of flexible PVC with spun polyester fiber, which is attached to recycled plastic lumber. Fasteners are 316 stainless steel full annular ring shank nails. They are designed to provide a protective barrier between hard surfaces such as docks, seawalls, pilings, and the hulls of boats and yachts. They are available in black in standard lengths of 6′, 8′, 10′, and 12′. Custom fenders are available upon request.

Concrete Pile Extra Heavy Duty (CP) FOCPB

These fenders are designed for vessels up to 150′ in length. This system provides maximum protection for the berthing of large yachts against concrete. They are available in black in lengths from 2′ to 10′.
Concrete Corner Dock Fenders

FOCOB

This 90° horizontally or vertically mounted corner fender is designed and engineered specifically for concrete corners. The placement of the mounting holes is designed to prevent the corner of the concrete from cracking. They are available in black, in lengths from 2" to 10'.

Seahorse Tide Right

Tide Rights patented system FLOATS will keep your fender and cleat at the preset height. This allows you to preset the height of Tide Rights fender and cleat to align with your boat. No matter the tide, Seahorse Tide Rights will be there. Super strong, super clean and super easy to use.

Corner Bumpers

Designed with a flat end to mate with most dock bumper extrusions. It offers 6" or 10" of protection on two sides of the dock corner, with a side height of 4". Made from non-yellowing, very tough, marine grade vinyl. Available in white or black.
Fender Braces

When pilings are not available for mounting the fenders, fender braces provide a strong, solid place to mount them. Made of marine grade structural aluminum I-beams and aluminum plates, these braces can be made to accommodate almost any situation.

The FEND-ALL® or FEND-OFF® Fenders, mounted on plastic 4x4’s, are thru-bolted using stainless steel bolts. Standard braces are 1’, 2’, 3’, 4’ 6’ and 8’. Custom braces and U channel brace are available upon request.

Powder Coating Available.
(White Powder Coating Pictured)

Aluminum Corner Fender Braces

Need to bolster your deck but don’t have a piling available to mount your fenders in every area? Try these fender braces for the same strong, solid control to make almost any area mountable.

Marine-grade Aluminum I-beams plus aluminum plates provide an affordable option that doesn’t skimp on security or safety for your marina. Don’t worry with pilings and the other heavy-duty installation efforts. Aluminum dock braces are designed to withstand harsh marine environments. Choose from 10 different length options and contact us for support including how to add Fend-All®.

S-Cleats sold in addition to braces.
Piling Caps

The superior line of piling caps is offered in 26 sizes from 6" to 18" (in 1/2" increments), in both black and white. Round cone is also available in green. An injection-molded process makes these caps superior in strength, flexibility, and dimension consistency. The material contains mildew inhibitors and is UV stabilized. These piling caps will stand up to the harsh marine environment, keep birds from roosting, and protect pilings from internal rot which extends the life of pilings for many years. When ordering piling caps, if the piling measures an uneven increment, order the next half-size up.

Example: if piling measures 9-1/4", order 9-1/2" cap.

Enhance your deck with the elegance of Copper Piling Caps

Solid Natural Copper Post & Piling Caps

Quality products made to stand the test of time

Cap diameters made on the ¼" increments to achieve a great fit
Dock Ladders

All ladders are made of high quality Series 6000 marine grade aluminum and TIG welded for superior strength and rigidity. They feature grooved ladder rungs, which allow for extra traction and water run-off. Each step equals approximately 1' down from the top on the mounting surface (i.e. 5 step ladder = 5' down from deck). Custom designs, wide tread and custom lengths are available upon request.

Floating Dock Lift Ladder

The same as our standard lift ladder, but with a shorter base to remain above water level, when mounted on a floating dock. Available in 3, 4, 5, and 6 Step.

Standard Lift Ladder

Available in 3, 4, 5, 6, 7, and 8 Step

Manually lift up when not in use. Ladder stores upright completely out of water. Lift 250 lb. capacity.

Straight Ladder

Available in 3, 4, 5, 6, 7, and 8 Step

Fixed stationary ladder often referred to as “safety” ladders.
**FloatStep® Dock Ladders**

**Presenting the award-winning, patent-pending FloatStep® Dock Ladder**

- Fabricated with marine grade 6000 series aluminum
- TIG welded construction by AWS Certified welders
- Provides safe access at any water level or tide on floating or fixed docks and seawalls.
- The only dock ladder that automatically adjusts to water level changes keeping the ladder section free of marine growth.
- Durable molded plastic float with buoyancy control valve.
- Optional upgraded FloatTrak™ system now available! Recommended for rough water environments.
- Available in 3, 4, 5, 6, 7, 8 steps

City of West Palm Beach Docks
4 Step model – great for floating docks

City of Key West Docks
5 Step model

Marina-Products.com | 954-462-9047
Our cast aluminum light fixtures come in a wide variety of colors and finishes to match any outdoor décor. They are powder coated to hold up in a marine environment so they are perfect for dock lighting. Single, double and piling mounted fixtures are available in heights from 1' to 9' tall. Mounting options include 4” square posts, 3” round posts, wall mount arms and direct mount flanges. Additional options include on/off switches, single outlets and double outlets.
Solar Marine Lighting Products

1nm Solar Marine Lights
1-Nautical Mile Solar light with constant or flashing lighting modes. Multiple illuminating colors to choose from. Great for dock lighting, channel markers, warning lights, buoys, and more...
Available in White/Blue/Green/Amber/Red

Solar Piling Lights
The 8” Solar Piling Light is the most advanced, robust, and aesthetically appealing solar piling light to hit the market!
Available in White or Black finish with color changeable LED! (White - Blue - Amber)

Solar Deck Lights
Industrial strength solar powered dock light made from marine grade anodized aluminum for superior protection in harsh marine environments.
Available with White LEDs Only

Solar Piling Down Lights
Amazingly bright yet aesthetically appealing indirect downward lighting illuminates your dock surface providing a safe and elegant look for your dock.
Available in White or Black finish with White or Amber LED illuminating color

Solar Pagoda Lights
The Solar Pagoda Piling Light provides the classic Florida dock appearance without electrical wires.
Available in White finish only with choice of White or Amber LED

4pk Solar Dock Dots
The smallest, solar lights you have ever seen! Easy to install in minutes with a quick 1-3/8” drill bit or hole saw.
Available in White, Blue, Green, Amber, Red

10” Solar Cleat Light
10” Marine grade anodized aluminum cleat that will illuminate the dock surface. No longer a dock hazard & No more stubbed toes at night!
Available with White LEDs Only

Solar Sky Lights
Intelligent overhead safety & security lighting for docks & marinas. ALL-IN-ONE design makes installation a breeze. LED doubles in brightness when motion is detected.
Available with White LEDs Only
Deep Glow lights are up to 60% brighter than other underwater dock lights. Reflecting all of the available light towards the surface creates a much brighter glow than other underwater lights. Depending on water clarity and depth, our lights can illuminate a diameter of up to 30 feet!

Our lights can withstand prop wash, wave action and even impact from cast nets. They are the toughest and lowest profile lights available, helping to avoid damage from outboard motor skegs and fishing lines.

Deep Glow Lights are not only the toughest lights in the industry, they are brighter, easy to install and are well known for attracting fish.

Deep Glow products are environmentally safe and emit ultraviolet, colored light designed to attract and excite a variety of marine life. The lights begin to attract baitfish, which then attracts larger fish. As time passes, the fish become accustomed to visiting the light nightly since it produces a readily available food source.

Bulb/Lamp: 150 Watt Metal Halide Lamp Over 10,000 Lumens Superior Color – Green, Blue, Red and Clear Rated Average Life of 5500 Hrs.
Anglers LED advanced underwater lighting system is like no other. The patent pending design is an energy-efficient system without sacrificing power or luminosity.

Set up so simple – unbox, drop into the water, and plug in. Within minutes you’ll be enjoying your new waterfront oasis.

- Energy-efficient LED uses up to half the power of conventional bulb systems
- Low-voltage LED means no high voltage going into the water, providing a safer swimming environment
- Precision machined aircraft aluminum body with triple o-ring seal guarantees a leak-free system
- Designed to reflect light and heat to the 1/2" thick lens which virtually eliminates algae and barnacle growth
- Waterproof power supply with water resistant GFCI protection
- Engineered with a lower center of gravity, allowing it to be tossed into the water, making installation simple and quick
- Modular design allows multiple lights to connect from one power supply
- Pressure tested to 150 psi, or 345 ft
- Utilizes a true vivid green LED light, unlike conventional yellow metal halide bulbs
- 50,000 hour LED vs. 5,000 hour metal halide
- Patent pending design
- 1 year manufacturer defect warranty

Marina-Products.com | 954-462-9047
All of our fish tables are constructed with high quality materials. The table top is made out of FDA approved high-density polyethylene. There are no cracks, crevices, or screw holes for bacteria to build up in. The framework is made of T6061 marine grade aluminum and TIG welded for strength and a clean finish. Each leg comes with its own mounting bracket (vertical) and flange (horizontal), offering good stability. Powder coating is available.

“Niagara” Fish Cleaning Tables
With the same great materials and construction as our other Fish Cleaning Tables the "Niagara" Tables feature continuously running water to keep the cleaning surface free of fish remains. Rounded corners enhance the self-cleaning feature by preventing fish debris from lodging in corners. Offered in standard sizes from 38" x 18" up to 72" x 24."  

Options for all tables:

(Shown) Knife Rack, Cup Holder
(Also available) Aluminum Hose Holder, Stainless Steel Sink, Faucet, Custom T-Tops, Custom Enclosed Base.

Standard 2 Leg Fish Cleaning Table
The 2-leg table projects out from the dock and mounts to the dock’s substructure, without taking up dock space.

Standard 4 Leg Fish Cleaning Table
All four legs mount firmly to the dock.

Tables Sizes (2 and 4 Leg)
38" x 18" x .5 Top
48" x 24" x .75 Top
72" x 24" x .75 Top
60" x 24" x .75 Top
84" x 24" x .75 Top
96" x 24" x .75 Top

**Custom tables are also available.**
Outdoor Showers / Hose Holders

Outdoor Showers

7’ tall outdoor pool, deck and dock shower with 8” x 8” aluminum base. Comes standard white powder coated with chrome plated faucet and self closing shower valve. Optional rain head, hose holders, and custom powder coat colors available. Also available in square showerheads.

Hose Holders

These are manufactured using a quality casting of non-corrosive aluminum alloy. They are available in natural aluminum finish or powder coated in black or white. Custom colors also available. Available in 2 sizes:

- Small Hose Holder, 50’
- Large Hose Holder, 100’

Water Stanchion

4” x 4” x 36”
Natural aluminum finish or powder coated white or black. Options include custom sizes and colors. Also available with dual hose holders and hose bibs.

Life Ring Stand

Our Life Ring Stand is 50” in height and offers an easily accessible and eye catching way to store your life ring. This marine grade aluminum 4”x4” stand has an 8”x8” square base plate, which mounts to the dock. The life ring is secured to an aluminum bracket, which comes in 2 sizes to accommodate either a 24” or 30” life ring. Life rings are available and are sold separately.
Floating Dock Hardware
Heavy duty hardware available for building your own floating dock.

In-Stock Sizes include:
- 24" x 36" x 12"
- 24" x 36" x 16"
- 24" x 48" x 12"
- 24" x 48" x 16"
- 24" x 48" x 20"
- 36" x 48" x 12"
- 36" x 48" x 16"
- 36" x 48" x 20"

Permafloat by Cellofoam®
Our foam filled plastic floats are top quality and have accurate, tank-tested buoyancy ratings. They are designed for durability and performance, and are available in over 60 standard sizes. 15 year warranty.
Individual Work Floats
Cleaning, painting or repair work of any kind can be done from individual work floats. Work floats are available in 4’x8’ or 5’x8’ and are totally portable and stackable. Each float comes with cleats attached with stainless steel fasteners.

Carolina Water Works
We construct our floats with thick-walled rotationally molded polyethylene that encapsulates expanded polystyrene – the finest flotation materials available today.

Other features include:
- Resistant to both impact and damage from marine life
- The best warranty in the industry – a full 12 years
- Environmentally approved and exceeds all new government regulations

Offering Sizes
Dock Float D335 (2’ x 3’ x 12”)
Dock Float D470 (2’ x 4’ x 12”)
Dock Float D700 (3’ x 4’ x 12”)
Dock Float B600 (2’ x 4’ x 16”)
Dock Float B900 (3’ x 4’ x 16”)
Dock Float B1200 (4’ x 4’ x 16”)
Dock Float B1850 (4’ x 6’ x 16”)
Dock Float C490 (2’ x 3’ x 18”)
Dock Float C650 (2’ x 4’ x 18”)
Dock Float C1000 (3’ x 4’ x 18”)
Dock Float C2000 (4’ x 6’ x 18”)
Dock Float F1100 (3’ x 4’ x 20”)
Dock Float F1500 (4’ x 4’ x 20”)
Dock Float F2200 (4’ x 6’ x 20”)
Dock Float F750 (2’ x 4’ x 20”)
Dock Float E900 (2’ x 4’ x 24”)

Computations of Loading Requirements
Length x Width = Square feet of dock
Square feet x 35 lbs.
(15 lbs. weight of dock = 20 lbs. weight of people) = Total load

Divide Total Load by Dock Float Model Number
Example: 10’ x 12’ dock = 120 sq. ft.
120 sq. ft. x 35 lbs. = 4,200 lbs.

4,200 lbs. / Model 470 = 9 floats
4,200 lbs. / Model 650 = 7 floats

All dock float are designed with a flange used for easy installation on new or existing docks.
Additional flotation may be necessary under high load points, such as where a gangway rests upon your dock.
Lighthouse

The most popular power pedestal on the market, the Lighthouse pedestal has a wide range of features. With units in service around the world, this stylish power pedestal is recognized for its practicality and exceptional durability. Its heavy resin housing with a two-part polyurethane coating provides a UV resistant, long lasting finish.

Lighthouse SS

The Lighthouse SS offers the same standard features and available options as the Lighthouse, but is made with a long lasting 316L stainless steel. The housing comes with a limited lifetime warranty for superior quality and performance. Additional options include single and three-phase 100A receptacles with ground fault protection.

Admiral SS

Truly the flagship of our unitized pedestal line, the Admiral SS possesses amperage capabilities up to 500 Amps. Voltages of 480/277 three-phase, 120/240 single-phase, 120/208 three-phase and combinations of these receptacles, can be included in one unit to serve nearly any size MegaYacht. Truly unique dual voltage options set the Admiral SS apart from all other power pedestals. Special 200A receptacle options available.
Newport Harbor Mate
The most innovative mini-power center available, the Newport Harbor Mate is host to a variety of electrical services, contained in a compact yet strong housing and is packed with features. This pedestal can be mounted to any dock box or shipped from the factory with a stainless steel stand.

Firehouse
Created as a complete solution for fire and rescue needs, this pedestal features fire extinguisher storage and a mounted alarm strobe light and siren, as well as an optional life ring. The alarm strobe light and siren can be automatically activated when the door is open or optional life ring is removed. Fully complying with NEC and NFPA code requirements, this pedestal provides safe access to emergency equipment in a compact form.

Mariner
The Mariner is a lighting bollard that provides ambient dock lighting while occupying limited dock space. This unique product can be customized to meet any height requirement from 1.5’ to 4’ tall.

Hatteras Light
The Hatteras Light is the perfect shore power pedestal for residential docks and small to medium size boats. This pedestal offers the same features as the popular Lighthouse but in a much smaller footprint. At only 30” tall the two-part polyurethane housing will never rust or corrode and comes with a limited lifetime warranty. This unit is popular for smaller slips at marinas and any private dock requiring less than 50A service. Optional lens colors available by request (Amber, Blue, Clear)

Pedestal Features:
- 360° 4W LED Lighting standard
- Lockable weatherproof doors standard
- NEMA 3R enclosures standard
- Digital electronic sub-metering available
- Single & Dual Water Values options
- GFCI breakers & receptacles offered in 5mA and 30mA
- 20A, 30A, 50A, power receptacles configurations available
Dock Boxes

Low Profile Dock Box
Available in these sizes:
DBRW50LP - 50"W x 22"D x 24"H Wt. 47 lbs.
DBRW60LP - 60"W x 22"D x 24"H Wt. 68 lbs.
DBRW70LP - 70"W x 22"D x 24"H Wt. 79 lbs.
DBRW80LP - 80"W x 22"D x 24"H Wt. 92 lbs.

Rough Water Dock Boxes
Sleek rounded edges, with domed lids. All cut and exposed edges are white gel coated with interior black webbing and 5" S/S louvered vents on both ends. Gas shocks for easy opening and 2 S/S lockable latches.

High Profile Dock Box
This high profile dock box has enough room to store dive tanks in an upright position, plus extra room for more gear. Optional 6 pack dive tank storage rack available
Available in these sizes:
DBRW50 - 50"W x 29"D x 33"H Wt. 80 lbs.
DBRW60 - 60"W x 29"D x 33"H Wt. 95 lbs.
DBRW70 - 70"W x 29"D x 33"H Wt. 125 lbs.
DBRW80 - 80"W x 29"D x 33"H Wt. 145 lbs.

Rough Water Trash Container
- Ultra-violet resistant white gel coat
- Sleek rounded edges, domed lid
- All cut and exposed edges are gel coated
- Great for home use or marina
- Holds a Rubbermaid trash receptacle purchased separately
Trash container available in these sizes.
17 1/2"L x 17 1/2"D x 31"H Wt. 47 lbs.
21"L x 21"D x 35"H Wt. 59 lbs.

Triangle Box
DBCMTRI
54" L x 34" D x 29" H Wt. 52 lbs.

All standard dock boxes are constructed with a minimum 3/16" heavy fiberglass thickness using all stainless steel (corrosion-proof) hardware.
White gel coat finish on inside, ultraviolet resistant white gel coat on outside.
Low Profile Dock Box
Available in these sizes:
- DBCM01 - 40"W x 19"D x 21"H Wt. 42 lbs.
- DBCM02 - 48"W x 20"D x 18"H Wt. 45 lbs.
- DBCM054 - 54"W x 22"D x 24"H Wt. 47 lbs.
- DBCM06 - 66"W x 22"D x 22"H Wt. 53 lbs.
Two S/S 5" louvered vents with gas shocks come standard in these sizes:
- DBCM071 - 71"W x 22"D x 24"H Wt. 74 lbs.
- DBCM09 - 96"W x 22"D x 25"H Wt. 97 lbs.

Standard Profile Dock Box
Available in these sizes:
- DBCM03 - 44"W x 26"D x 27"H Wt. 43 lbs.
- DBCM07 - 75"W x 27"D x 26"H Wt. 75 lbs.
- DBCM08 - 85"W x 27"D x 26"H Wt. 90 lbs.

Fiberglass Marine Steps
- UV resistant white gel coat
- Non skid built in to each step
- Shown with optional hand rail
- Dimensions do not include flange
Available in:
- 1 step 21" L x 17" D x 12" H
- 2 steps 26" L x 24" D x 20" H
- 3 steps 26" L x 36" D x 30" H (shown)
- 4 steps 31" L x 51" D x 42" H

51 Inch Dock Box
Space-saving design with built-in seat for convenience.
- DBCM05 - 51"L x 30"D x 30"H Wt. 68 lbs.
The patented systems are tested and proven to meet the rigorous standards of the United States Navy Heavy Weather Mooring Codes

- Hurricane Proven
- No More Slack Lines
- Self-Adjusting
- No Maintenance
- Solid Stainless Steel
- Sizes for any Boat

• Built-in Line Hook
• Easy In & Out line handling
• UV Stabilized Super Strength Polymer Mooring Block
• Works on Any Tie-up – slips, side ties, and floating docks!

Standard Mooring Whips
Equipped with a fixed angle base, used on boats up to 33' including runabouts, center consoles, ski and bass boats under certain mooring conditions. Comes with two standard bases, two solid fiberglass poles, two 1/4" nylon lines with tension adjusters, four spliced dock lines, wood dock mounting bolt kit and installation instructions.

Heavy Duty Mooring Whips
For boats up to 75' in length
Keeps boats from striking the dock and causing damage to both the boat and dock. Heavy marine grade cast aluminum braces that automatically adjust for tide changes and bring the whips up when not in use.

**Aluminum Cleats**

Made from high quality cast aluminum – Alloy 356 – the corrosion resistant cleats can be mounted vertically or horizontal with 1/2" bolts. The large “footprint” provides maximum holding strength. Powder coating is available.

Heavy galvanized, coated iron, open base cleats. Made from malleable iron and hot dipped galvanized, they are ideal for vertical or horizontal mounting on piers and docks. For installation, Straight Cleat uses two 3/8" hex bolts or lags. Ships Cleat uses two 5/8" or 3/4" hex bolts or lags. Powder coating is available.

---

**Line Supports**

Our line supports are designed with routed edges which provide a smooth finish to prevent chafing of the lines. They install easily onto pilings with two 60-penny nails. Length - 12"
